Campaign Kazakhstan

Campaign for democratic, social & workers rights in Kazakhstan

We wholeheartedly agree with the European Parliament's recent condemnation of the abysmal treatment of political prisoners in Kazakhstan which got the support of 483 MEPs. We support, in particular, their call for the basic rights of Vladimir Kozlov, Vadim Kuramshin and Aron Atabek to be honoured. This must include "immediate access to all necessary medical treatment" and "regular visits, including by family members, legal representatives and representatives of human rights and prisoners' rights organisations".

In addition, we believe that these fighters should be immediately released from detention without conditions – free to exercise their rights to actively participate in the struggle for democratic and human rights and political, social and artistic freedom in Kazakhstan.
